Introduction

- Dialog Management
- Types of Dialogs
- Creating an Alert Dialog
- Creating a Progress Dialog
- Creating a Custom Dialog

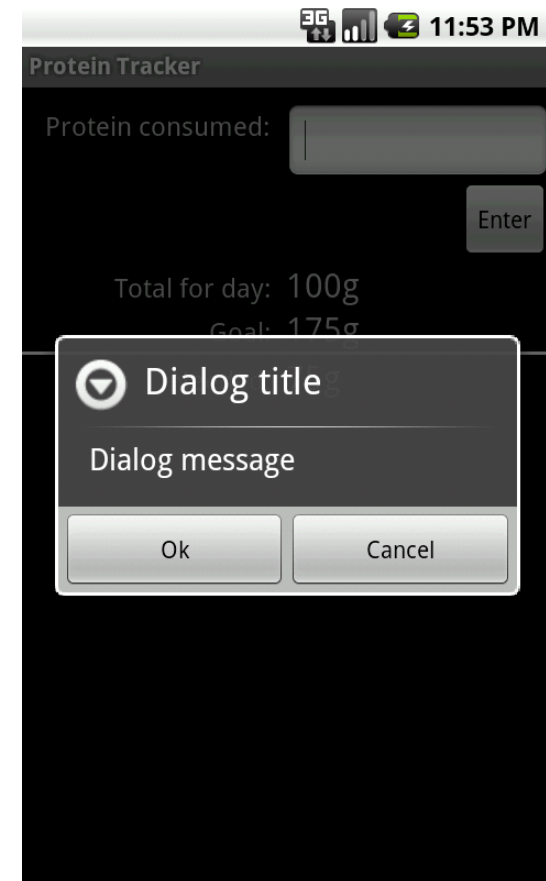

Dialog Management

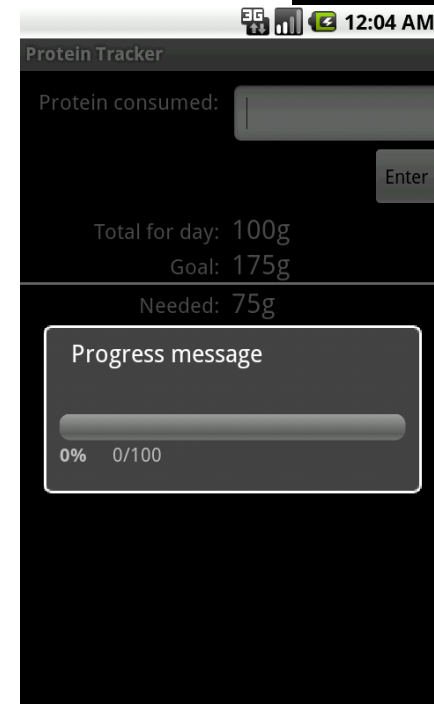

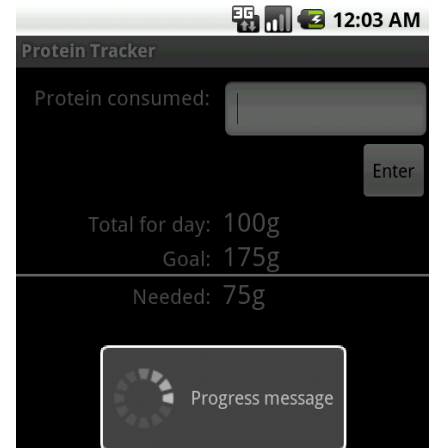

Alert Dialog

- Most commonly used dialog
- Uses
 - General alerting of status
 - OK/Cancel questions
 - Simple selections
- Builder class makes it very easy
- 1, 2 or 3 buttons
- Can use selectable lists in dialog

Progress Dialog

- Used for long running operations
- Can show progress and message
- Two modes
 - Spinner
 - Horizontal
- Have to watch out for UI threading
- Static method for creating and showing
- Cancel?

Custom Dialog

- Can display whatever you want
- Uses same layout file as Activities
- Can interact with View in the layout
- Always shows a title
- Manage just like Alert Dialog
