

Menus

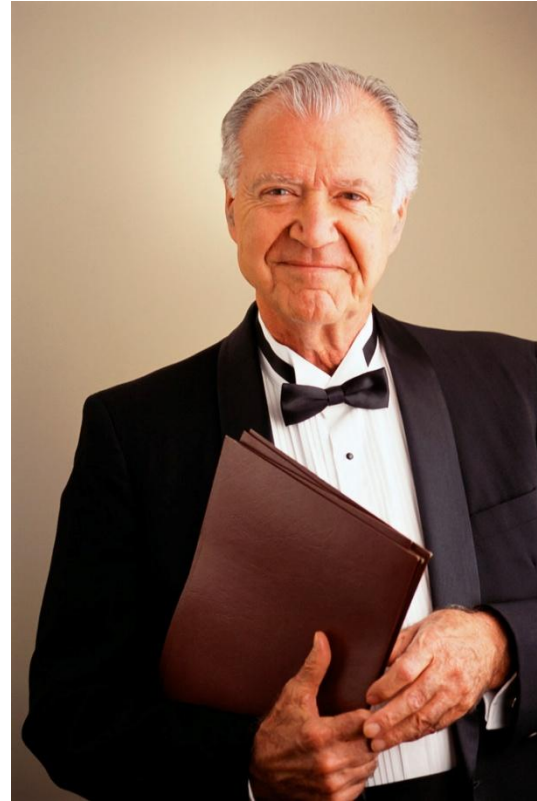

John Sonmez

www.pluralsight.com

Introduction

- Types of Menus
- Creating an Option Menu
- Creating a Context Menu
- Creating a Submenu

Option Menu

- Displayed when user hits hard menu key
- 6 items, then shows a “more” item
- Usually link to application settings
- Specific to the activity

3G 2:01 AM

Protein Tracker

Protein consumed:

Enter

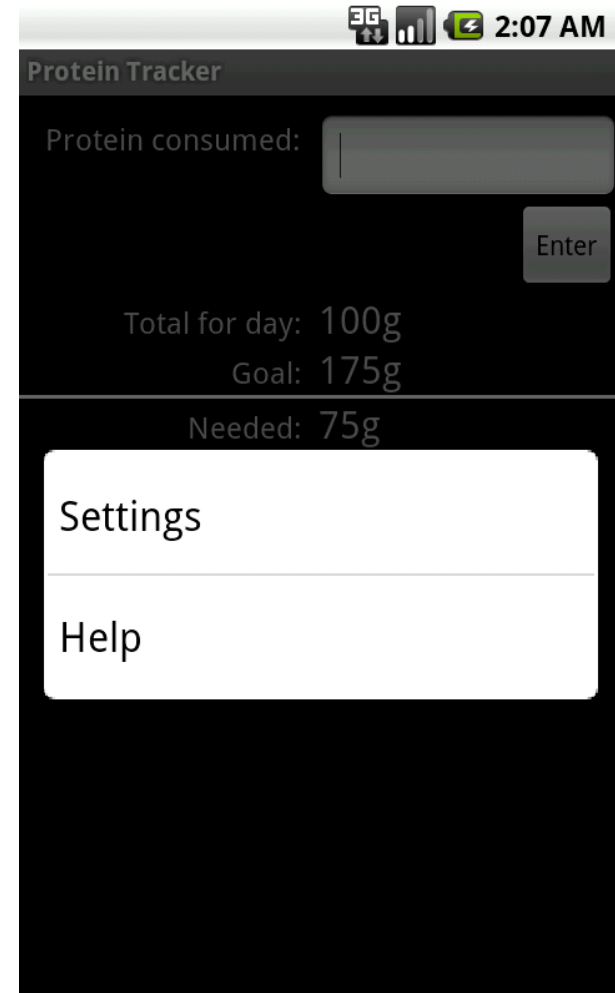

Total for day: 100g
Goal: 175g

Needed: 75g

Settings Help

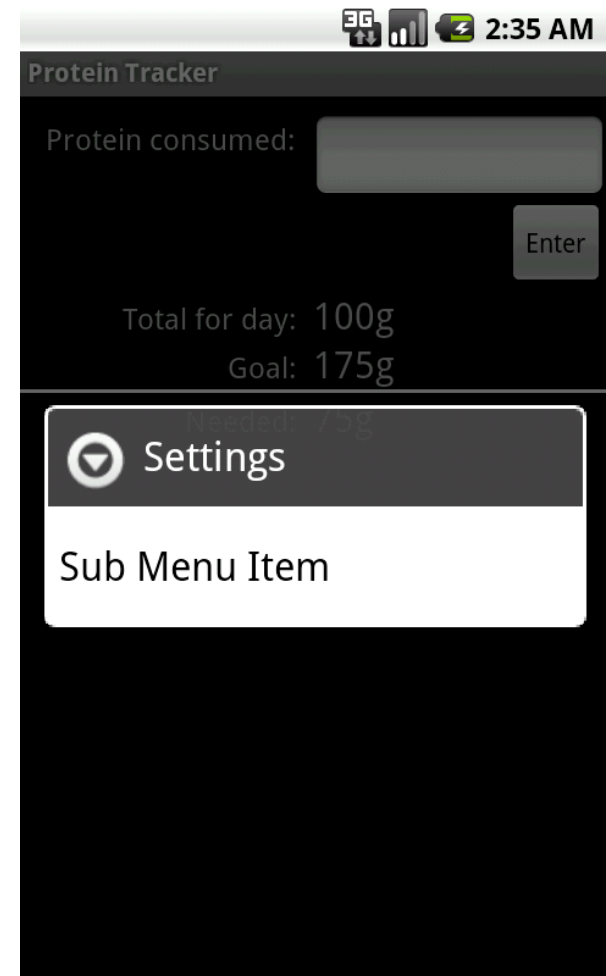

Context Menu

- Similar to right click on PC
- Context for the item it applies to
- Long touch a UI element to access
- Example:
 - Delete
 - Copy
 - Cut
 - Rename

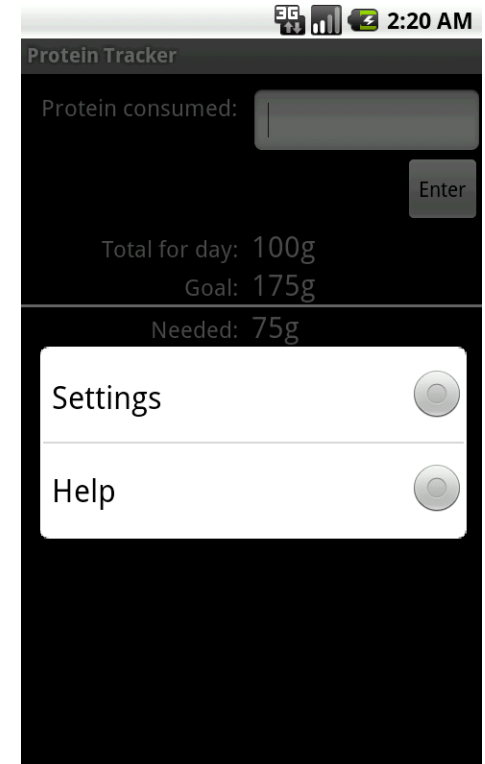

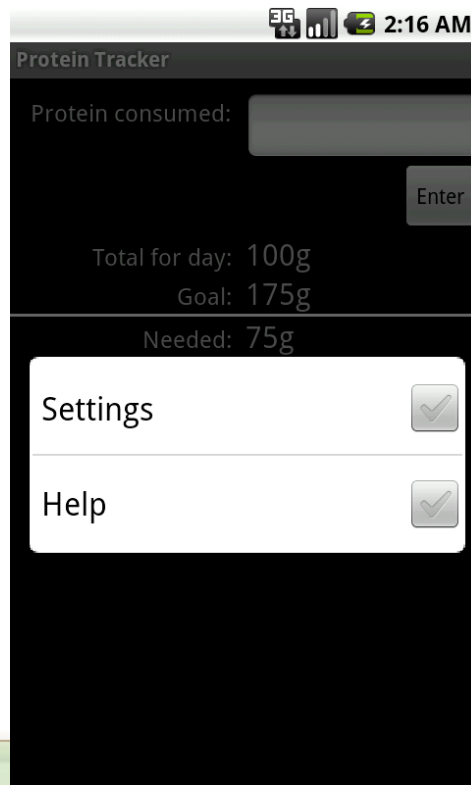

Submenu

- Menu as an item in another menu
- Only 1 level of nesting
- Allows for hierarchy

Checkable Items

- All menu items can be checkable
- Only context menu displays checks
- Can set single item or group
 - Single select
 - Multi-select

Summary

- Types of Menus
- Creating an Option Menu
- Creating a Context Menu
